High quality antennas designed for low power short range telemetry systems. Omnidirectional, Range High Gain Antenna. Compared with IEEE 802.11g wireless Linux HW NIC Antenatal 2G-2009.

dipole / wire antenna antennas

60 years after its first flight at the site, the parabolic dish is still making scientific breakthroughs

Developed Infrared (IR) Transparent Conductive Electrode Technology (2008), - AFOSR Lu, X. A Fully Printed Flexible 4 BIT 2D (4X4) 16-Element Phased Array Antenna For Lunar (2009), - NASA GLENN Antenna For Lunar (2009), - NASA GLENN developing...
